PROFESSIONAL SUMMARY

Computer Science undergraduate pursuing B.E. in Cybersecurity with practical experience in network security, vulnerability assessment, and cloud security. Proficient in Python, Linux, Nmap, Wireshark, and security monitoring. Familiar with TCP/IP, firewalls, AWS (EC2, S3, IAM), access management, and incident response. Passionate about protecting network and cloud infrastructure through proactive security practices.

EXPERIENCE

DYNDOX | Remote | Nov 2025 - Jan 2026

- Assisted in monitoring and securing enterprise network infrastructure using **Wireshark, Nmap, and Snort**, analyzing traffic patterns and identifying potential security threats.
- Conducted vulnerability assessments and security audits using **Nessus, OpenVAS, and Nmap**, documenting findings and recommending remediation measures.
- Monitored and analyzed security events from **Splunk SIEM**, firewall logs, and **IDS/IPS solutions**, supporting threat detection, investigation, and incident response activities.
- Collaborated with cross-functional teams to strengthen network security controls, perform firewall rule reviews, enhance security documentation, and support compliance initiatives aligned with industry best practices.

TECHNICAL SKILLS

Security Testing & Analysis: Burp Suite, Nmap, Wireshark, Metasploit, Gobuster

Cloud: AWS (EC2, S3, IAM)

Programming & Scripting: Java(DSA), Python

Operating Systems: Kali Linux, Windows

Security Concepts: Cryptography, Application Security, Network Security, Vulnerability Assessment, OWASP Top 10

Documentation & Reporting: Technical Documentation, Research Analysis, Process Documentation, Report Writing

PROJECTS

Package Guard | AI-Powered Supply Chain Security Scanner

- Developed a GitHub repository scanner to detect malicious packages and software supply chain threats across multiple package ecosystems.
- Implemented detection techniques for typosquatting, dependency confusion, suspicious maintainers, and malicious install scripts.
- Integrated AI-powered threat analysis to classify risks, generate security insights, and recommend remediation actions.

VulnForge | Find the Flaw, Fortify the Code

- Performed security assessments on DVWA and OWASP Juice Shop learning environments.
- Documented findings related to SQL Injection, XSS, authentication weaknesses, and security misconfigurations using OWASP Top 10 guidelines.
- Used Burp Suite, OWASP ZAP, Gobuster, and Nmap for reconnaissance, traffic analysis, and validation.

EDUCATION

CHITKARA UNIVERSITY | Aug 2023 - Aug 2027

Bachelor of Engineering (Computer Science Engineering – Cybersecurity)

Relevant Coursework: Information Security, Network Security, Cryptography, Operating Systems, Data Structures & Algorithms, Object-Oriented Programming.

ACHIEVEMENTS

- Secured 9th rank out of 272 teams in MythX CTF (CTF7) by KIET University
- DSCI/EY AISS CTF Hackathon by DSCI & EY

CERTIFICATIONS

- Junior Cybersecurity Analyst by CISCO
- Foundations of Cybersecurity by GOOGLE on COURSERA
- Identity Security Leader – SailPoint Technologies
